

## SERVICES

### Vehicles & Installation

**Robertson Geo can design and supply a complete logging vehicle to meet any operational requirements. We offer a choice of standard layouts or can customise to fit a vehicle of your choice.**

Installation includes the winch and controls, generator mounting and probe storage tubes. Options include the logging boom, air-conditioning, external spot-lamps and a choice of benches and storage cabinets.

Electrical wiring for both mains power and low-voltage for lighting is to a high professional standard suitable for tough field conditions.
