

## SERVICES

### Rentals

**Rental can be very cost effective in situations where a short-term project does not warrant the purchase of equipment or in remote operations where spare probes are needed for backup.**

Most Robertson Geo equipment is available on short or long term rental, with a minimum rental period of three days in the USA, or 15 days in the rest of the world.

Robertson Geo can rent full systems or individual probes, as required. All rental probes are supplied with a current calibration certificate, calibration file and acquisition software.
